

**REMARKS**

A copy of the "Notice of Drawing Inconsistency with Specification" is included herewith. In response to this Notice, the Applicants notes that the language describing FIG. 5 is already provided in the specification on page 19 of the specification as follows:

FIG. 5 illustrates a block diagram of a system 500 for SAW testing, in accordance with a preferred embodiment of the present invention.

In order to be consistent with this language, the Applicant therefore requests that the following language be included in the "Brief Description of the Drawings" by amendment as indicated herein:

-- FIG. 5 illustrates a block diagram of a system for SAW testing, in accordance with a preferred embodiment of the present invention. --

The Applicant requests that the foregoing description of FIG. 5 be inserted between the description for FIG. 4 and the description for FIG. 5 in the "Brief Description of the Drawings".

Applicant submits that this change to the specification will not necessitate the production of new drawings. Additionally, the Applicant submits that this change to the specification is consistent with language already provided in the specification. The Applicant therefore requests entry of these modifications to the specification for the purpose of completing publication of the patent via the Office of Patent Publications of the U.S. Patent & Trademark Office.

Respectfully submitted,

November 20, 2005
